

Smokeless Wax KC6020P

Smokeless Wax KC6020P is an organic wax with high hardness and melting point. With good transparency, KC6020P increases coating hardness, which makes the surface be scratch-resistant and anti-after tack. KC6020P produces less smoke than ordinary polyethylene wax.

1. Technical parameters

Appearance: White powder or granule

Freezing point: 97°C-99°C

Dropping point: 110±2°C

Penetration (25°C): <1mm

2. How to use

Extrusion after full mixture. And the dosage is 0.5%-2% of the total amount. The specific dosage should be determined according to the test.

3. Packaging and storage

Packed in polyethylene lined kraft paper bags, with a net weight of 25kg. The package is sealed and stored in a cool and dry place.

Shelf period is at least 1 year.
